

WHAT WE ARE ALL ABOUT

The Vehicle Maintenance Management Conference celebrates 70 years of bringing industry leaders together to exchange knowledge and experience making this conference a must attend event once again.

TOMORROWS TECHNOLOGY TODAY is this years theme with opportunities to Learn what's new, see what's on the horizon, be part of hands-on sessions, welding classes, WABO Certification and over 60 management and technical training sessions.

You can attend several different conferences throughout the year for new knowledge, or attend this years VEHICLE MAINTENANCE MANAGEMENT CONFERENCE and be exposed to it all in one place.

We are pleased to announce that South Seattle College is our new home for the conference. This educational facility specializes in Heavy Diesel Mechanics and all the support topics related to the industry.

Don't miss this years event. Register now at vmmc.us

WHAT SESSIONS ARE PLANNED

- Advanced Technology Vehicles
- Heavy Duty Engine Panel
- Maintaining Diesel Exhaust Systems
- Do You Maintain, Service or Change Tires?
- Cummins Alternative Fuels
- Motion & Flow Control Products
- Oil Filtration Technologies
- Telematic Hydraulic Integration
- Hands On Crane Inspection
- Fuel Distribution Technologies
- PACCAR Products
- Allison Transmissions
- Wheel Alignment Technologies
- Snap On Diagnostics
- Auto Lubrication Equipment
- Tire and Wheel TIA Certification
- Cummins Engine Diagnostics
- Welding and WABO Certification Testing
- Air System Overview and Diagnosis
- Management Roundtable
- Off Highway Electronic Computer Network Diagnostics
- Coolant Chemical Composition

And many more (subject to change)

"We want to share the knowledge that each of us brings to the conference and learn from our vendors and sponsors. See you at this years Conference."

George Schillinger

*Chairman VMMC
Senior Territory Manager, Western U.S.
Parker Filtration Group*

"Come see for yourself, see the benefits of it, see how it can help you with knowledge and experience you can gain. Be a part of this year's VMMC. It's training and knowledge for our industry."

John Lightner

*John Lightner, Vice Chairman VMMC
Technical Sales Support Manager
Cummins Sales and Service*

VMMC

Vehicle Maintenance Management Conference

SOUTH SEATTLE COLLEGE

SEATTLE, WASHINGTON

MARCH 26 - 28, 2019

70th Anniversary Edition

WHO IS VMMC

VMMC started over 70 years ago when a University of Washington Professor realized the answers to relevant questions resided in the industry knowledge and experience. He pulled together people to exchange ideas and knowledge in an educational environment rather than seeking information in a trade show environment.

Over the years, this conference has built on the premise that everyone learns from each other. Manufacturers frankly discuss their equipment, how it acts and reacts in your fleet. Users provide knowledge of the same equipment in actual use.

This is the place to learn about new ideas, new issues, and new technology. You will meet and talk and develop relationships with industry leaders. Vendors who you work with daily will be available throughout the conference. This is the conference that builds networking relationships that you'll have for the rest of your career.

INDOOR AND OUTDOOR TRADE SHOW

Major manufactures will highlight everything new in the industry at the vendor display area. Representatives will be available to answer your questions. There will also be heavy equipment for inspection.

WELDING & WABO CERTIFICATION...

The WABO Welder Certification Program was developed in response to a need for a uniform method of determining qualifications and testing procedures for certification of structural welders and welding operators.

Working in partnership with South Seattle College, VMMC will offer WABO (Washington Association of Building Officials) Welding Certification Program testing. The program is a certification test for structural welders and welding operators. There will be two different sessions (see website for information) and will be an additional fee based event. Sign-ups are on a first come first served basis.

HANDS-ON TECH CHALLENGE

A new version of the VMMC Tech Challenge will be offered at this years conference. After taking a written test, participants will work on three diesel engines to diagnose issues. (see website for more detailed information) Several sessions of this years Tech Challenge will be offered and sign-ups will be taken at check-in at the conference. Prizes will be offered.

TIA CERTIFICATION CLASS

Everyone who handles tires and wheels must be trained according to OSHA standard number of CFR 1910.177 and WISHA training standards. This particular session will cover all of the mandatory training to meet those standards. Successful completion of this training is verified by the issuance of a training certificate that reflects the success passing of a written test that is administered at the end of the training. Certification comes from industry group known as TIA.

This is an all day Wednesday Class and will have separate fees and a limited number of registrants. (see our website for more information).

WHO SHOULD ATTEND?

- Fleet Maintenance Professionals
- Technicians and Mechanics
- Shop Leads and Managers
- Fleet Supervisors
- Students
- Instructors and Trainers
- Product Line Reps
- Manufacturers
- Engineers
- Speciality Equipment Operators

ABOUT THE AREA

Located on an 87-acre hilltop campus in West Seattle, South Seattle College offers panoramic views of the city skyline and surrounding mountains.

Maintaining everything from trucks and tractors to ferries and forklifts; diesel engine technicians serve a vital role in keeping our society connected and running smoothly. South Seattle College's Diesel & Heavy Equipment Technology program facilities will provide new hands-on opportunities in a classroom environment for this years VMMC.

Hotels and Restaurants are located close by. For a list of Conference Hotels working with the VMMC with special rates visit our website.
